ASC Homecoming Sparked by Two Victories

ASC Wins 97-73; Activities Climaxed By Armstrong Dance

Homecoming weekend was climaxed by a well-attended dance which followed the 97-73 victory over Norman College, Saturday night, Jan. 22.

The victory, inebriating to some, was a thrilling finish to a successful weekend to the rest of the students. Accompanied by the sounds of the Shandells, the students celebrated with high spirits.

Miss Martha Wilson, Homecoming Queen, led out the first dance with Brooks Youmans, escort. Clothed in a brilliant lime-green suit, the queen presented a radiant figure to the eyes of the students.

Miss Wilson Named Queen; ASC Beats Southwestern

ARMSTRONG STATE COLLEGE christened its 1966 Homecoming Weekend with a victory over a sturdy and theatrical Georgia Southwestern team. The first half was nip and tuck all the way with Armstrong on the short end of a 33-30 half-time score. The Geechees, while not playing their best game of the season,

Miss Martha Wilson, Homecoming Queen.

did a commendable job on the court.

During halftime, Student Body President Lake Holt was the master of ceremonies for the crowning of the 1966 Homecoming Queen. The gym lights were turned off and a spotlight captured the first member of the court, Susan Stevens. The light then spotted each of the other court members—Yvonne Tenney, Martha Haynes and Sandy Moore—as they were introduced to the crowd. Each girl walked down a red carpet to receive a bouquet of carnations presented by Dick Sanders, President of the Freshman Class and Pat King, Secretary of Student Affairs.

As the time for the announcement of the queen drew near, the spectators became quiet. After Martha Wilson was named 1966 Homecoming Queen, a thunderous applause arose from the bleachers. Miss Wilson received a bouquet of red roses from Mr. Dale Price, Director of Student Activities and was crowned by the 1965 Queen, Mrs. Jane Lamb Letchworth.

Georgia Students Affirm Viet Nam Commitment

Emphatic public affirmation of the United States commitment to South Vietnam is the goal of a three-phase state-wide student movement recently initiated at Emory University in Atlanta.

Named "Affirmation: Vietnam" by its student organizers, the movement will begin with a comprehensive poll of the residents of Georgia regarding their opinions of the U.S. commitment in Vietnam and will culminate in a massive assembly at Atlanta's new athletic stadium.

The third point of the plan of the organization is a statewide speaker's bureau to help inform the public on the facts of the Vietnam crisis—abroad and at home.

A politically non-partisan effort, "Affirmation: Vietnam" has already received endorsements and promises of support from student leaders of all the major colleges in Georgia. Included among these supporters are

Dick Langford, president of Emory's Student Senate; George "Buddy" Darden, President of the University of Georgia Student Body; and Howard Tellepson, President of the Georgia Tech Student Body, all of whom are charter members of the student steering committee.

(Cont. on page 7)

Senate Drafts Freshman Proposal

At the last Senate meeting, the Senators began voting on a new set of Senate rules, modeled on those of Clemson University. The Senate also passed the Charter of the Chess Club, an organization for students who are interested in learning to play chess or who already play.

Five of the six freshmen senators

whose grades fell below a 2.0 honor-point average put a suggestion before the Senate to draft a letter to the Administration asking for probationary status for the five until mid-quarter. This was proposed because the freshman class would have had only one representative in the Senate. The Administration has announced acceptance of the proposal.

Armstrong crushes Norman College 97-73.

GEECHEE - CHANGE OR NOT TO CHANGE

By Sandy Beasley

If the student body so decides the Armstrong State College GEECHEES may cease to exist. Elaine Mamalakais, President of the Student Senate, said that the Senate, sometime in the near future, is going to set up a suggestion box in the Student Center, so that students can suggest mascot names which they feel will be more appropriate than Geechee. The five top names submitted, along with the name GEECHEE, will be placed on a ballot, and the student body will then be given the opportunity to choose whether or not to retain the name

GEECHEE or adopt a new mascot name.

When asked what prompted the Senate's decision to set up suggestion boxes, Miss Mamalakais replied that many students feel GEECHEE is inappropriate because no one knows exactly what a GEECHEE is, other than "a person from this general area." Also there is no way to symbolize a GEECHEE precisely because no one knows what it is.

The balloting for the retention or adoption of the mascot name will be held two weeks after the suggestion box is set up.

Homecoming Dance held in Memorial "Dump".

editorials . . .

In reporting comments of the student body overheard in the few weeks elapsed since we occupied our new campus, the Inkwell feels it is not too early to point out certain items of inconvenience facing each of us in our daily academic life.

1. Sidewalks: Are you walking more and enjoying it less. Perhaps the symmetrical layout of crosswalks that lead you off in a variety of directions—some of which may be toward your destination—is the reason you are spending more time “on the move.”

You don't want to avoid the sidewalks and go “as the crow flies,” but in the case of the student center side where the walks are conspicuous by their absence, you are forced to walk on the “wild side.”

Perhaps the answer would have been to wait and lay the walks after the students had pointed out the most direct and practical routes by simply following concretely their “beaten path.”

2. Trash containers: Find yourself losing keys and small items within the candy wrappers and wadded notes filling your pocket or purse as you realize there are no trash containers in the open forcing you to choose between “litter-bug” and “little space in your bag”?

3. Parking and drives: Remember the first time you pulled in at the college entrance and felt you were crossing “no man's land” just north of Da Nang when your wheels hit the shell holes and you mentally began estimating the cost of tires, rods, shocks, etc.? One good thing though—you did slow down... fast.

Realizing full well that it is a tremendous manpower and time problem in moving, the Inkwell only suggests that these (and other items to be listed in the future) would further enhance our college and provide some basic necessities needed at our “remote” location.

Billy Whitten
Managing Editor

Moving to a new campus always brings problems. This move was no exception. However, one major problem has been solved by some sound judgment on behalf of the Administration.

It seems that five of the six freshman senators failed to maintain the 2.0 honor-point average required to keep them in office. The problem was this: The ASC Constitution had no provision covering the choosing of replacements, or even whether to replace them. Thus, the problem of replacement fell to the Administration who had three possible choices as to a solution. They could have had the class president appoint replacements for the five or have a special election to fill the seats. The third choice was to allow the senators concerned to maintain their seats until mid-quarter, and if their grades were up to the required 2.0 they would keep their seats for the rest of the year, provided their grades stayed at the required level.

The last choice is not the best permanent solution to the problem, but it is the best solution of the three proposed. In making this choice the Administration showed wisdom and true concern for the problems of the student-government and the student body as a whole. They are to be congratulated for reaching that solution at all, and especially for the promptness with which they arrived at it. Their decision actually grants the student-government adequate time in which to work on a constitutional amendment setting up a permanent solution to this critical problem.

Starrs Announces Cast for Musical

The Armstrong “Masquer” tryouts were a complete success according to director William Starrs. Starrs said, “I've never had this good a turn-out at Armstrong before.” Approximately 50 people tried out at the two scheduled tryouts. The cast for “Take Me Along”, a musical adaptation of “Ah Wilderness!” by Eugene O'Neill, is as follows: Ed Ravencroft, Nat; Katee Wells, Essie; Hugh Cobb, Sid; Mary

McCoy, Lilly; Pat King, Richard; Yvonne Tenny, Muriel; Sue Jaye Punzel, Mildred; Alan Smith, Macomber; and Pat Rony, Art.

The play is tentatively scheduled for the last week in February. It will run for a week because of the size and seating capacity of the auditorium.

Mr. Starrs also asked for people to work backstage in props, scenery, and lighting. He extended an invitation to all students to come to the performances, explaining that they pay their student activity fees for just such events.

Dear Editor...

Dear Sir:

Armstrong State College finally has its new campus, but it seems to me that quite a few students are carrying the sentimental bit too far. Although the new campus is lacking many important things, it is far superior to the old Gaston Street University. The new campus may be small and have little historic background, but we must realize that the collection of old buildings on Bull Street started out the same way. I think that the statement that the old campus had a great college atmosphere is a farce. For the first time Armstrong faintly resembles a college.

The new campus is something all students should be proud of. We finally have something we can really work with. The new campus does not have the so called cultural atmosphere of the “Fine Arts Center” at Bull and Gaston Sts., but someday it may if the student body forgets the old and works with the new.

Armstrong State College unmarred by progress for thirty-one years reads the old sign, the new sign just reads Progress.

Sincerely yours,

Pat King
Sophomore

Possibility of Armstrong Use of Hunter Facilities Suggested by Georgia Tech

By Sue Jaye Punzel

The Industrial Development Division of the Georgia Institute of Technology, working for the city and county as a consultant on potential uses of Hunter Air Force Base, recently suggested extensive use of the Hunter base property primarily for educational purposes.

The report estimated that 7.8 million dollars would be added annually to the community by expenditures by institutions participating in education or research. The possibilities for educational and research facilities are as follows: (1) a South Eastern Center of Human Development for research and development involving regional problems of the young and aging, (2) a University Research Center complex of dependent or independent facilities, (3) a Chatham Technical Institute which would be compar-

able to Southern Tech in Marietta, Georgia, and (4) facilities for use by Armstrong State College.

The base, as a whole, was suggested as a resident upper division of Armstrong State College because of the increasing number of transfer students from junior colleges in the future as predicted by the IDD. It was also suggested that the area be used as a four-year resident institution because of the need for expanded facilities.

The report states, "The utilization of Hunter's dormitory and housing facilities could result in an approximate increase in the area's resident student enrollment of 1,600 single students and approximately 500 family units. The estimate is based on the projected capacity of existing housing and does not include the potential increase in non-resident students."

"It is estimated that the average single student living in a college facility spends approximately \$462 per year in addition to payments made directly to the institution for tuition, fees, and room and board. The married student, on the other hand, spends approximately twice this amount. Based on these estimates, therefore, an increase in college enrollment equivalent to the present housing facilities at Hunter could result in an additional annual income of 1.2 million dollars to the community from student expenditures."

According to the report, there is a definite need for expansion of the facilities because of the enrollment expansion. Between 1960 and 1970, there is a predicted increase in high school graduates of 39%; and between 1965 and 1978, there is a projected enrollment increase at Armstrong of 122%.

An additional humanities building of approximately 30,000 square feet appears to be needed and housing for student nurses should be provided. "In addition, there is a strong possibility that Armstrong will attract more than the current 12 per cent to 15 per cent of its students from outside the immediate county."

ASHMORE EXPLAINS PLAN FOR ASC ACCREDITATION

The future looks bright for the accreditation of Armstrong as a four year college. Dr. Ashmore explains there are certain procedures which must be followed in obtaining accreditation. Two classes must be graduated before Armstrong can be considered, the first to be in 1968 and the second in 1969. Then the Southern Assoc-

iation of Schools and Colleges will become retroactive, that is the diplomas given before accreditation will be as good as the ones after.

ASC is presently accredited as a two year college. Credits from Armstrong may be transferred to any college, provided they are a "C" or more.

At the present time 40% of faculty have their Ph.D. degrees. This is more than the 30% required to be accredited. Dr. Ashmore reports that the college hopes to increase this percentage to 50% of the faculty having their doctorates by next fall and to maintain this 50% ratio permanently.

The main problem Armstrong is facing for accreditation is the library. Presently there are 22,500 volumes in the library, and the need is 50,000. The Board of Regents has granted \$25,000, and additional help is anticipated. Dr. Ashmore states, "The library is our last big hurdle, and we rapidly move ahead."

Dr. Anderson's main project, the extended evening school program, will begin materializing this quarter. The new program will offer night students the same courses and professors as offered day students. This is opposed to the old plan which separates the day and night schools into two different programs.

Anderson Becomes New Associate Dean

By Anita Pierce

On January 12, Dr. Ashmore announced the appointment of Donald D. Anderson as new associate dean. Dr. Anderson received his bachelor's degree in social science from Georgia Southern College and his master's degree in school administration and guidance from George Peabody College. He recently received his doctor of education degree from Auburn University. Between 1959 and 1964 Dr. Anderson held various positions with the Chatham County public schools system at Jenkins High School, Savannah High School, and Chatham Junior High.

As associate dean Dr. Anderson will be in charge of non-credit courses and an extended evening program. He will also be in charge of any programs of research that are assisted by the federal government.

Rogers Explains Desirability Of Hunter Property for ASC

By Alan Smith

Dean Rogers in an interview Jan. 13, expressed the desirability of gaining a part of Hunter Air Force Base as the new site for Armstrong.

The reasons for renewed speculation on the utilization of Hunter were disclosed in the report by Georgia Tech. Concisely, the report stated that Georgia must have new four-year resident colleges. The lands and facilities at Hunter would provide Armstrong with the opportunity to have a resident four-year institution or to retain the present campus as a two-year community college and use Hunter as a resident upper-division college under Armstrong administration.

Dean Rogers pointed out that the following comments are his and do not necessarily reflect the thoughts of the Board of Regents who have complete control of the affairs of the

University System.

He began the interview by asking, "If you had just bought a brand new Volkswagen and then someone gave you a fully equipped Cadillac, which car would you keep?"

The benefits of Hunter are dormitory facilities, three possible sites for a Student Center (the Officer's Club, the NCO Club, and the Enlisted-men's Club), and access to the city. The dorms would house 3,000 students who would have the same room-and-bath arrangements as have been planned for the commercial dorms. The Officer's Club would offer a bowling lane, photography dark room, lobby, cafeteria, and several meeting rooms.

In summarizing, he said, "All I can see is the positive side; there is no negative to the picture."

Armstrong State College . . . History Yields to Progress

Downtown Are Memories And Unforgotten Records

By Valarie Mopper

Armstrong State College, organized on May 27, 1965, officially began its life on Tuesday, September 17, 1935, in the former residence of the George F. Armstrong family. The magnificent structure was donated by Lucy M. C. Moltz in memory of her first husband. Mayor Thomas Gamble and his Aldermen founded Armstrong Junior College to satisfy the need for an institution of higher learning in Savannah.

The Armstrong home on Bull and Gaston Streets was later enlarged by the addition of five buildings which were either built or acquired for the college. These structures are the science building, Gamble Hall, named after Mayor Thomas Gamble; Jenkins Hall, named after Herschel V. Jenkins; the school of finance and commerce donated by Mills B. Lane and named after him; the Hunt building, given in memory of J. W. Hunt, and the library building, Hodgson Hall.

Dean E. A. Lowe was the first and one of the foremost leaders of Armstrong Junior College. He was appointed the head of the college on June 20, 1935. His former experience in working in the field of education helped to build a steady foundation on which the college could grow. Dean Lowe left Armstrong in June of 1941 and was succeeded by J. Thomas Askew. On September 27, 1944, Foreman Hawes became the president of Armstrong after the resignation of Thomas Askew. Mr. Hawes was succeeded by Dr. Henry L. Ashmore, who is currently the president of Armstrong State College.

On the first day of classes for the two-year institution, the enrollment was 171 students. The number of students increased to two-hundred and seventy-three in 1939, three-hundred and twenty-two in 1940, nine hundred in 1954, and to one thousand and seventy-five in 1956. The number of students presently attending ASC is approximately thirteen hundred, the largest enrollment in the history of the college.

The curriculum for the first year included diplomas in the fields of Liberal Arts, Home Economics, and Commerce. One of the purposes of the junior college was to prepare the student with a basic knowledge of a subject so that he could continue his education and go into a specific field. If the student did not wish to further his education by attending a senior college, he then had a liberal education with which he could enrich his life. The various extra-curricular activities consisted of a monthly paper, the Inkwell, the first edition published on November 17, 1941; a dramatic department; basketball, fencing, boxing and football teams; a literary society; a glee club; and the possibility of a student orchestra. The activities of the school were greatly supported by the student body as well as by the citizens of Savannah. The Alma Mater was adopted in December of 1939. It is the "Hymn of Joy" which is the close of Beethoven's Ninth Symphony. Scholarships, donated

now offers degrees of Bachelor of Arts, Bachelor of Science, and Bachelor of Business Administration.

The old campus has been deserted for a new, more efficient one. The old structures will linger forever in the memories of the many people who attended classes there. In the past, many of the students who attended

Armstrong became some of Savannah's as well as the country's, most prominent doctors, lawyers, businessmen, and civic leaders. The destiny of the old campus has not yet been decided; but no matter what is done with the lovely old buildings, they will still remain Armstrong College to those who knew and loved them.

ed by various organizations as well as by private persons, were available for the qualified and conscientious student, as they are at present.

On December 17, 1948, the "Junior" was dropped from Armstrong Junior College and the name became simply Armstrong College. The name of the school was again changed to the present Armstrong State College. Armstrong was a municipally-supported institution until January 1, 1959, when it came under the control of the Regents of the University System of Georgia.

On November 1, 1962, the Mills Bee Lane Foundation purchased over 200 acres for a new campus. The Board of Regents selected the site on the Abercorn Extension. In 1964, Armstrong State College was voted a four-year college by the Regents and

Leaders Comment Favorably On New Armstrong Campus

Maclean Looks Forward To Bright ASC Future

With the following statement, Mayor Maclean expressed his feelings concerning the new campus of Armstrong State College:

"As we start the new year at Armstrong State College with a new campus, I can think of many benefits both to the student body and the community.

"We have long needed a four year college in Savannah and are grateful that we had the foundation for one started years ago with the establishment of a junior college so that when

the opportunity arose we were in position to begin a new era in higher education in this city.

"The new location of the campus, with its attractive buildings and grounds will, I am sure, mean much to the present student body and faculty giving a new impetus to the desire to better themselves and the community in which they live. The advent of the four year college means much to all of us in that the culture of Savannah will be enriched and broadened.

"With this fine facility in our midst, a greater number of our young people will be in position to obtain a college education and their talents and ability saved for our community rather than losing them to other localities as we have in so many instances in the past.

"Therefore, let us all, student body, faculty and citizens, look forward to a very bright future for this fine institution in its new environment."

Mayor Malcolm Maclean

SOLMS EXPRESSES NEED FOR EXTENSION OF SPACE

By Judith Traft

Mr. Anthony Solms, prominent Savannah lawyer and chairman of the Board of Regents from the first district of Georgia, has placed education in a position of importance as he watched the new Armstrong State College campus emerge from its early foundations for completion. Obtaining various compensations from the governor of Georgia, Carl Sanders, or constantly bargaining with local business firms, Mr. Solms has played a major role in the development of Armstrong State College.

During an interview with Mr. Solms, he stated, "It gave me a good feeling to go out and see the college after spending hours of work on it." After inspecting the completed campus for the first time on January 5, 1966, Mr. Solms expressed satisfaction toward the architecture of the buildings, genuine college-life atmosphere, attractive and excellent lab facilities, library, faculty comments, and to everyone who rendered initial contributions to construction. Under objective criticism, Mr. Solms emphasized that the new Armstrong State College, built as a two-year institution, should be sufficiently and properly revised to accommodate the needs of students and faculty of a four-year institution. This need for space as Mr. Solms intimated would be solved in the near future.

Student President Shows Enthusiasm On New Campus

By Mary McCoy

Lake Holt, President of the ASC student body, has expressed enthusiasm over Armstrong's move to the new campus. The new campus, he feels, is a distinct improvement over the old one and certainly something that all ASC students should be proud of. "The new campus gives us a feeling of belonging, a place with which to identify ourselves," he said. He added that the campus is a visible means of showing that Armstrong is keeping up with educational trends.

Holt found the laboratory and library facilities most praiseworthy. He was particularly impressed with the library building—"Imagine having comfortable chairs and enough room to study in", but expressed regret that students had not responded more actively to the library's book drive. He further commented that Armstrong's most pressing need for future expansion was a larger student center and more auditorium space.

Dr. Rogers Rates Facilities Far Superior to Old Campus

By Cindy Coffey

Armstrong's Dean of Student Affairs rates the facilities of the new campus far superior to those of the old campus, but he sees an immediate need for additional facilities.

In an interview for the Inkwell, Dr. James Rogers praised the library building as being very well equipped with up to date furnishings. He added that for the time being the classroom facilities are adequate. He also said that the science department has the most up to date equipment.

Dr. Rogers said that one of the greatest needs is for a larger student center, especially important in a commuter college such as Armstrong.

The student center should provide meeting rooms for campus organizations and should have a study room and a recreation room separate from the dining area, Dr. Rogers added. He also cited the need for a larger book store.

Noting that Armstrong President Henry Ashmore is planning to request two additional buildings, Dr. Rogers said he hoped an addition to the student center would be included.

Lake Holt, ASC President of Student Body.

ARMSTRONG COLLEGE . . .

An Era of History

An Era of Progress . . .

Affirmation: Viet Nam

(Cont. from page 1)

ing committee.

One of the main purposes of the organization is to present to the public the various historical bases for the United States' present position in the Vietnam situation.

A statement prepared by the student organizers of "Affirmation: Vietnam" explains, "In recent months world opinion has been focused on small segments of the United States' population who openly protest their government's involvement in Vietnam. These objectors give strong voice to their convictions, and the nations of the world, friend and foe alike, must surely wonder at the strength of conviction of those who consider the United States' commitment an undeniable and irrevocable one.

"The opinion of the majority cannot be obscured by the voice of the minority. This minority has a right to be heard and, indeed, should and must be heard. However, there rests with the majority the task of making known to the world that our nation's commitment is supported by her people and will be fulfilled. This task can no longer be ignored."

Geechees Clip Georgia Southern Frosh

Speedy Danny Sims, 5-8 Geechee sparkplug, led the ASC quintet to a late rally and a victory over the Georgia Southern Freshmen, 65-58, in the Geechees' new gym on January 11.

With just several minutes left in the contest and the locals eight points behind, Sims staged a performance which has become so typical of him. Combining stolen passes, driving layups, and free throw accuracy, the hustling guard revitalized the ASC

Armstrong paces victory over Georgia Southern Freshmen, 65-58.

According to its constitution, "Affirmation: Vietnam" through its three-pronged plan of attack (consisting of the educational effort, the opinion poll, and the assembly) will "analyze and present the factual foundations of the position and commitment of the United States in the present Vietnamese conflict."

The accomplishment of these goals will entail "the presentation of public discussion groups, forums, panels, lectures, public assemblies, or other similar programs, the publication of papers, pamphlets, and books, and making known the results of public opinion," the constitution states.

Although the organization consists entirely of college and high school students of the state of Georgia, it has received endorsement and much support from outstanding national leaders of government, business, and the press.

Included among these are Georgia's Governor Carl E. Sanders and Senators Richard B. Russell and Herman Talmadge; six Georgia congressmen: G. Elliott Hagan, Howard "Bo" Callaway, James A. Mackay, Charles D. Weltner, John James Flynt, Jr., Russell Tuten and Augusta Courier Editor Roy Harris.

Other student leaders who have pledged their support to the program are Marvin Moate, president of the University of Georgia Student Senate; Charles MacDonald, president of the Georgia State student body; Jim Hambrick, president of the Georgia State night school; Frank Hughes, president of the Oglethorpe student body; Debbie Rosen, president of the Agnes Scott student body; Jane Sampson, president of the Spelman student body; and Tommy Tucker, president of the Emory College Council.

Remar M. Sutton, Jr., a student in the Business School at Emory, is general chairman of the project.

attack. Tommy Cannon sank two charity tosses to knot the score with 2:57 remaining.

The final seven point spread was accumulated with free throws by Sims, Danny Hattrich, and Mike Kellett as the Baby Eagles were forced to foul by an Armstrong freeze.

Both teams had very poor nights from the floor with ASC hitting only 19 of 51 field goals for 37 per cent. The GSC Baby Eagles made good on only 24 of 83 attempts for 29 per cent.

The victory pushed the ASC overall record to 10-4 and was the fifth consecutive home victory for the Geechees.

Sims led all scorers with 23 tallies, followed by Hattrich with 12. Big Malcolm Rich led in the rebounding department with 17.

Geechees Bow to Southern Tech

In a nip and tuck battle, the ASC Geechees succumbed to a hot-shooting Southern Tech team, 100-90, in a contest played in Marietta, Georgia.

Behind the scoring of Malcolm Rich and Danny Sims the locals kept

LITTLE MAN ON CAMPUS

"GOOD HEAVENS! HAVE YOU TURNED IN YOUR MID-TERM GRADES ALREADY THIS SEMESTER?"

victory in sight until the closing minutes of the battle.

The score remained close until exceptional marksmanship by the Hornets pulled the contest in their direction. Dick Waters and Steve Hudson hit consistently with fine outside shots to pace the Tech surge.

In the second half, Sims kept the Geechees' hopes alive with a 20 point spree, but the high-scoring Hornet attack soared to an 18 point margin. The scrappy ASC quintet managed to fight within six points of the leaders.

The cold Geechee point production was sparked by Rich with 29 and Sims with 26 tallies. Danny Hattrich and Bobby Cannon bucketed 10 points apiece for the Geechees. Rich cleaned the backboards for 20 rebounds and Bobby Cannon collected 17.

Waters netted 34 points and Hudson 30 to pace the Southern Tech assault.

Danny Sims

(Cont. from page 8)

Dean's List last quarter. "I'm proud of Danny and the rest of the boys who made the Dean's List last quarter. This is a good example of the type of boys we have on this team," Coach Tapp said.

Danny feels that there is a good chance that this year's team will win the conference. "I don't think we were mentally ready for the first two games this year. It really hurt because they both count in the conference standings; but as close as the conference is this year, I think we've got a chance to win the championship," Danny said.

The Geechees proved themselves a capable basketball team recently when they won the Hunter Air Force Base Christmas Invitational Tournament. During the tournament, Danny shined on offense and defense and was rewarded for his efforts by being named to the all-tournament team.

Fraternity Presents MVP Trophy

Armstrong State College now possesses a beautiful new trophy, which is the first of its kind for the school.

Tau Epsilon Phi fraternity, which is in the process of obtaining official school recognition, presented a Most Valuable Player trophy to the school prior to the Armstrong State-Brunswick game played in the new ASC gym on January 8.

Tau Epsilon Phi president Stuart Neiman made the presentation to Dr. Henry L. Ashmore, president of ASC, who accepted on behalf of the school.

"I am certainly glad I am not on the committee making the most valuable player selection," said Ashmore. "With the boys we have on this year's team, it would be most difficult for me to choose any one individual."

The panel of judges is as follows: Ashley K. Dearing, prominent sports fan and follower of Armstrong basketball; Joe Petty, WSAV Television; Jay Lingle, Sports Director, WTOC Television; Billy Deal, Sports Editor, Savannah Morning News; Richard Conley, Sports Editor, Savannah Evening Press; and Mr. Dale Price, Director of Student Affairs at Armstrong State.

Actually, there will be two trophies — one for the school and one for the boy chosen as most valuable player. The trophy presented January 8, is a permanent possession of the school. Each year a new name will be inscribed as the most valuable players are chosen. In addition, to this, a smaller trophy, which is similar to the permanent one, will be given to the most valuable player each year.

TAPP SAYS DANNY SIMS WORTH 2 SCHOLARSHIPS

By Alvin Brown

"Check, 778, 926." These sounds are probably familiar to you if you have attended any of the Armstrong basketball games. Most of the time the person yelling these various combinations is sophomore guard Danny Sims. Although he is only five feet, eight inches tall, Danny calls the defense and runs the offense for the Geechees.

Coach Larry Tapp was recently quoted as saying, "He's worth two scholarships to us." This is easy to understand when one considers that Danny leads the team in assists with 28 and in most free throws made with 45. He also leads the team in field goal percentage with a remarkable 54 percent. He is second to Tommy Cannon in free throw percentage and second to Malcolm Rich in total points

scored. Danny's defense is also outstanding. When Middle Georgia came to Savannah to play the Geechees, they brought with them one of the leading scorers in the conference, Jimmy Tingle. Coach Tapp gave the job of containing Tingle to Danny, and he held the much bigger guard to a mere three points.

Sims appears to be the most versatile player of his size in the conference. Coach Tapp said, "Danny's floor game has been very outstanding and his scoring in the clutch has been very good this year. It seems that when the pressure is the greatest, his shooting percentage is at its best."

Danny's talents are not limited to the basketball court, however. He was one of four players to make the

BASKETBALL REVIEW

By Brooks Youmans

Geechees Upset GMC, 95-67

Armstrong State College initiated its new gym with an impressive victory over Georgia Military College, 95-67. The game was the first for the Geechees at the new campus.

A crowd of 900 saw the locals start slowly and fall to a deficit of 8-2 before a jumper by Bobby Cannon started the Geechees on a rally which saw them score 15 straight points. The fired-up Geechees took a 40-28 lead with them at the halftime break.

During the first few minutes of the second half, both teams kept the scoring about even until sparkplug Danny Sims and reserve Bill McAfee rocketed the Geechees into a 19 point lead with just five minutes left in the game.

The ASC assault, which placed six men in double figures, was led by consistent Danny Hattrich with 22 points and 9 rebounds. Sims, who accounted for 8 of 28 Geechee assists, followed with 19 points. McAfee netted 14, Tommy Cannon 13, Malcolm Rich 12, and Bobby Cannon's 11 rounded out the top ASC point-makers. Rich led the rebounders with 12.

Georgia Military was sparked by Hank Taylor with 21 points, Keith Faulkner with 18, Graham Bird with 12, and Ronnie Sapp with 11.

The victory pushed the ASC conference record to 4-3, and the overall record to 8-4.

ARMSTRONG (95)	FG	FT	F	TP
Rich	5	2-2	4	12
Sims	9	1-2	2	19
Hattrich	10	2-3	4	22
B. Cannon	5	1-2	1	11
T. Cannon	4	5-5	1	13
Kellett	0	2-2	0	2
Heidt	0	2-2	0	2

McAfee	55	4-4	2	14
TOTALS	38	19-22	14	95
GMC (67)	FG	FT	F	TP
Faulkner	8	2-2	4	18
Bird	5	2-4	4	12
Taylor	8	5-5	4	21
Sapp	4	3-4	1	11
Stokes	2	1-3	2	5
TOTALS	27	13-18	15	67

A.S.C. Wallops Brunswick

The Armstrong State Geechees, after a slow start, built a more than adequate half-time lead and went on to wallop Brunswick College, 88-55, at the local's gym.

A stubborn Brunswick defense, which kept the Warriors in contention for the first few minutes of play, crumbled before the hot shooting of Tommy Cannon, and the Geechees were never to be challenged again for the remainder of the contest.

In the second half, ASC steadily upped their lead behind the scoring of the Cannon twins. Bobby and Tommy. The Geechees, using their fast-break, forced the desperate Brunswick crew to foul to save a certain two-pointer for a driving Geechee.

Bobby Cannon tallied 24 points and grabbed 18 caroms in an excellent performance. Tommy Cannon bucketed 18 points, Danny Sims netted 16, and Danny Hattrich 11. Malcolm Rich, who scored 10 points, swept the backboards for 24 rebounds to lead the ASC cagers in that department.

Joe Kennedy tallied 15 points to lead B. C., and was followed by Barry Moody and Craig Davis with 12 points each.

ARMSTRONG (88)	FG	FT	F	TP
Hattrich	5	1-1	3	11
B. Cannon	7	10-13	3	24
Rich	4	2-3	2	10
McAfee	0	0-0	1	0
Sims	4	8-8	3	16
